LIVE AND LET LIVE

**100% Certified
Organic Cotton**

Control Union certified,
GM free, Okeo-Tex certified,
Ethically produced,
Environmentally friendly,
Transparent supply chain

Here at Okarma we simply want to make a difference – to create clothing and accessories that are a responsible alternative and that make a positive difference to our surroundings at every stage of the production process.

We set out to produce quality clothing and accessories while making a positive environmental impact by supporting organic textile farming. All of our products are certified with the Global Organic Textile Standard (GOTS). This is the worldwide leading textile processing standard for organic fibres, including ecological and social criteria, backed up by independent certification of the entire textile supply chain.

The aim of the standard is to define world-wide recognised requirements that ensure organic status of textiles, from harvesting of the raw materials, through environmentally and socially

responsible manufacturing up to labeling, in order to provide a credible assurance to the end consumer.

Not only are our garments ethically produced but they are also beautifully made out of the very finest yarn and include t-shirts, sweatshirts and bags. As well as organic clothing we are continually pushing the boundaries in innovation and our range includes two recycled products which are made using 100% recycled bottles. Approximately 44 bottles are used for our polar fleece jacket and 4 go into our recycled bag ... this really is making a difference.

Okarma is another way, Okarma is the ethical way

OKARMA RECYCLED

Have you ever wondered where your plastic bottles go after you throw them into the recycling?

Well, if they're lucky enough to end up in the hands of Okarma then they could be born again as a cosy fleece or handy bag.

Okarma's OK40 fleece jacket and OK44 Bag have an ingenious twist. Each fleece reuses approximately 44 plastic bottles and each bag reuses 4, saving landfill waste and thus environmental damage. What's surprising about these products is that they feel and look just as good as the same products not made from recycled materials, so there's really no excuse not to choose Okarma.

100% RECYCLED POLYESTER BOTTLE FULL ZIP FLEECE OK40

Innovative and eco-friendly. This jacket is made from polyester from recycled plastic bottles instead of oil. Pill resistant on one side. On average 44 plastic bottles are used to make one Okarma fleece.

Side pockets

Elasticated cuffs

Adjustable shock cord at hem

Full length front zip

Ethically produced with transparent supply chain
